Description:	The Wattz 1000 Laser pistol is a civilian model, with a much smaller wattage than the corresponding version made for the government. The reason is that it uses a laser focusing diode in place of the more expensive and more complicated crystal arrangement. Careful! Not suitable for children under 5, since even a weak laser is a dangerous one.

Description:	This pistol, developed by the Yuma Flats Energy Consortium, might have a name similar to the pulse grenade, but does not utilize an electromagnetic pulse (EMP) but an electric pulse. Unlike the EMP this does not only damage electronics, but also pretty much everything else. Kind of like a lightning strike.
